LinkedIn: [linkedin.com/in/quentinbeau-de-lomenie](https://www.linkedin.com/in/quentinbeau-de-lomenie)

AI-focused UX and Product Design leader with 15+ years of experience across mobile, web and desktop, designing both customer-facing products and internal tools. I currently **lead UX for AI-powered tools at HP**, designing assistants, chat experiences and workflows that help people complete complex tasks across devices. I work end to end with Product, Data Science and Engineering, using prototypes, telemetry and user feedback to ship and refine AI experiences that support better decisions for both customers and internal teams.

Experience

Hewlett-Packard (HP)

Lead Innovation (AI) User Experience Design | Singapore | 2022 - Present

- **UX Design Award 2025 (Product)** for AI consumer software.
- Defined **UX patterns for AI behavior**, including confidence, error handling and handoff to human support, so users stay in control even when the system is uncertain.
- Worked closely with Product, Data Science and Engineering to define telemetry and feedback loops, and used this data to iterate on AI interactions and improve decision quality over time.
- Built interactive **React Native prototypes using Tailwind**-style utilities (including Vibe-coded flows) and **shipped them through TestFlight**, enabling faster user testing and iteration on complex flows.
- Mentored designers and contributed to a shared design system with tokens and reusable components adopted across multiple product lines.

Razer

Manager, User Experience | Singapore | 2015 - 2022

- Led the mobile-first redesign of Razer's account and services portal for over **70M registered users**, improving onboarding speed and navigation efficiency **by approximately 30%**.
- Drove the design system used across **10+ customer and internal applications**, including shared components, interaction patterns and tokens for consistent, accessible experiences.
- Reviewed and aligned UX and UI across three product teams to ensure coherent journeys **across desktop, web and mobile**.
- Worked with Product, Data and Engineering teams to interpret usage patterns, refine key flows and reduce friction and support load over time.

Bandlab

Lead UX/UI Designer, Singapore | 2014 - 2015

- Designed and launched BandLab's first mobile app, scaling to millions of users within its first year.
- Iterated in 6-month cycles, prototyping and testing with musicians to validate usability
- Defined core mobile UX flows and contributed reusable design patterns for future updates.

French Television (Kids Mobile Publishing)

User Experience Consultant, France | 2013 - 2014

- Created a multi-screen experience for kids (6-12) in collaboration with stakeholders
- Facilitated workshops with management and marketing teams to align product goals.
- Conducted audience analysis of the previous app version to inform improvements.
- Specified the core user experience and explored gamification opportunities.

Earlier experience from 2010 includes UX and digital product design roles in agencies and startups.

Education

Strategic Marketing - CNAM, Paris

Visual Communication - EFFICOM, Paris

Skill

Leadership & Product - Leading and mentoring remote design teams, setting UX vision, strategy, and quality bar across enterprise platforms, partnering with Product, Engineering and Data to align roadmaps, KPIs, UX scorecards and cross-functional organizational change.

AI Solutions & Systems - AI-powered UX, large language model (LLM)-based assistants and tools, workflow and error-handling design, telemetry and feedback loops to improve decisions.

Design & Implementation - Interaction design, design systems and tokens, Figma/Sketch, HTML/CSS with utility-style libraries (Tailwind-like), responsive mobile, web and desktop UX.
